

Controls Systems Technician

United States of America, Kansas, Junction City

Field Operations

WD30090955147

What you will do

Performs assigned system commissioning using Johnson Controls configuration and commissioning tools. Troubleshoots and resolves basic HVAC mechanical, electrical, and controls problems. Responds to basic warranty calls.

How you will do it

1. Loads system-level controller software.
2. Performs basic commissioning and system diagnostics from system-level controllers to end devices (i.e. sensors, actuators, etc.) and completes all required commissioning documentation.
3. Keeps management and JCI contractor or customer informed of job progress and issues.
4. Calibrates systems requiring basic electronic test equipment.
5. Completes administrative tasks including but not limited to time sheets, expense reports, and on-site documentation.
6. Documents changes and provides information for as-built documentation.
7. Communicates with the JCI contractor or customer upon arrival and before leaving the work site.
8. Follows all safety standards and attends required safety training. High degree of regard to employee and subcontractor safety.

What we look for

Demonstrated technical aptitude.

Able to use hand and power tools (i.e. drills, saws, etc.)
