Job Description

Salina Regional is completing a Windows 10 and wireless access point upgrade at their local facility and at a few surrounding hospitals under their umbrella. Travel will be 10-15 miles at most to Concordia using personal vehicles.

There are 1300 PC's, half of which need to be replaced/imaged and half of which need to be migrated from Windows 7 to windows 10.

350 Wireless access points to be replaced.

Tech's will work directly with 3 Techs that are direct hospital staff during normal business hours to image/deploy software, manage cables, replace computers, box up old equipment, and replace access points as needed. Monday - Friday 8-5, onsite. Must be able to lift up to 50lbs.

Additional Skills & Qualifications

Tech's must be presentable and customer service oriented.

Employee Value Proposition (EVP)

Long-term contract opportunity to work in a hospital setting

Work Environment

Salina Regional Hospital, and surrounding hospitals under their umbrella. Business casual attire, non-smoking campus.

Business Drivers/Customer Impact

Salina Regional has a cyber security insurance policy renewal on October 1st that requires all equipment to be upgraded to Windows 10 to adhere to security standards. This is a critical project to complete and allow them to stay compliant and receive the renewal.
